

Pipes Heating Band

The pipe heater wraps applied to pipes with a diameter range of 40 to 100 mm installed both indoors and outdoors, except in explosion hazardous environments.

Heater wrap are spirally stretched around the pipe and fastened by means of velcro straps (see picture).

COMPOSITION:

- External fabric in WR-FR certified poliester
- Fireproof insulation felt with aluminum side reflective.
- Internal fabric in siliconized aramid
- Neoprene power cable 4m lenght without plug.

Code	Dimensions	Power	Temperature control
TI_T.A.T00	1000X10cm	310W	THERMOSTAT 40°C

TECHINCAL DATA:

- Voltage: 230Vac.
- Dimension 1000x10 cm
- Power: 310W.
- Temperature: 40°C with with non-adjustable thermostat. Possibility of operating at 13°C on request.
- International protection: IP X4
- Certification: 
- The heater band should be wrapped in spiral along its entire length without leaving dangling parts not in contact with the pipe.

INDICATIVE LENGTH DEVELOPMENT OF THE BAND WRAPPED IN ACCORDANCE WITH THE PIPE DIAMETER	
Pipe diameter mm	Length cm
40	840
60	550
80	400
100	340
