

Replacement Lamps for external reflector systems

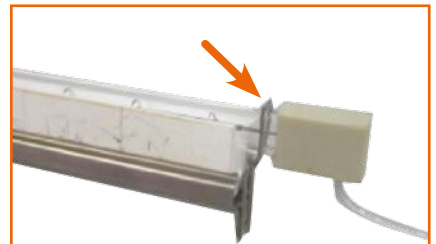

Replacing lamps with external reflectors can be a costly and time-consuming process. By using Victory Replacement Lamps, the original external reflectors can continue to be used with just the lamp being replaced. A simple modification to the existing clip allows the Lamp to be easily removed and replaced without the need to replace the entire fixture. Saving resources, time and significant costs on replacements.

Reduce time and maintenance costs

- Replace just the lamp, not the reflector
- Needs simple modification of the reflector with readily available tools
- Instructions provided

For the first replacement you will need a pair of metal cutters, a pair of pliers and a small file or emery paper.

You will have to cut through the top of the metal end clip to remove the lamp from the reflector.

01

Remove the lamp, including reflector, from the process machine.

02

Completely cut the upper section of the fixed metal clip at both ends using the metal cutters.

03

Remove the bulb and dispose in the appropriate recycling facility.

Technical Data

Replacement Lamps for external reflectors

04

Use the pliers to straighten the end clips and the file or emery paper the cut ends to remove any burrs.

05

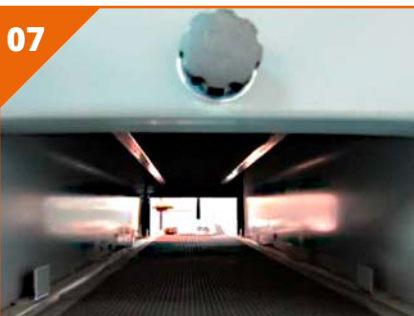

Place the retaining "spade" attached to the Victory replacement lamp over the reflector end clips.

06

Press the top of the "spade" down until the elbow/bend sits on the same feature at the base of the reflector end clips

07

The reflector and assembly can now be re-fitted to the machine.

In future, lamps can simply be removed and new ones replaced by sliding them on/off the end clips.
