

Portable humidification

Multifunction Portable Nebulizers

- Versatile
- Easy to carry
- Easy Maintenance

Technical features

The UX, UF and UCP Fly humidifiers (with different trolleys) are also available in a mobile version. Thanks to the special trolleys where the tank is applied, it is possible to move the machines according to your needs. These machines are ideal for humidifying, cooling, sanitizing, in various types of environments depending on the model chosen.

They can be used outdoors to cool dehors and outdoor areas or to reduce fine dust in small/medium areas such as building renovations and handling of dusty materials, and indoors to dispense nebulized sanitizing and antibacterial products.

- Innovative spraying system by means of a rotating nozzle disc instead of the traditional high pressure nozzles
- Resistant to corrosion and limestone
- Electromagnetic water pump with low energy consumption
- Low noise level
- Screw tank closure cap with vent valve
- Water drain plug

Model		UCP Fly Smart	UCP Fly Mobile	UF Mobile
Air flow	m ³ /h	800	1.800	9.000
Water tank capacity	l	43	60	100
Tank autonomy	h	2	2,5	4
Electrical supply	V ~ Hz	230 ~ 50	230 ~ 50	230 ~ 50
Power consumption	W	380	386	590
Range	m	6	10	20

Portable humidifiers

A series of versatile machines used for dust reduction, deodorizing in waste treatment, sanitization of the environments, humidification and cooling. Models come in stainless or galvanized steel, and plastic.
