

# Smart Camera User Manual

feelspo<sup>o</sup>t

## Preface

Thank you very much for purchasing our products, if you have any questions or needs, please feel free to contact us. Please read the instruction manual carefully before using the product and keep it properly. Our company will update the contents of this manual according to product function changes, and will regularly improve and update the relevant functions described in this manual. The updated content will be reflected in the new version of this manual without notice here. The content in this manual only provides guidance for users, and does not guarantee that it is completely consistent with the actual product. Please refer to the actual product.

## Warm tips

- ★ The camera should avoid focusing on strong light (such as illuminators, sunlight), otherwise it is easy to cause abnormal images (not a camera malfunction)
- ★ Avoid placing the camera in a harsh environment such as humidity, dust, extreme heat, extreme heat, strong electromagnetic radiation interference, etc., otherwise it will affect the performance and effect of the camera.
- ★ The camera should be installed in a place out of reach of children, the elderly and special groups to avoid unsafe incidents.
- ★ Please do not drop the camera from high altitude or knock it strongly to avoid damage to the camera.
- ★ If the camera fails, please do not repair it privately, please contact the dealer or manufacturer.
- ★ Before powering on the camera, please make sure that the power source is consistent with that used by the camera.

## Tuya APP installation, registration and login

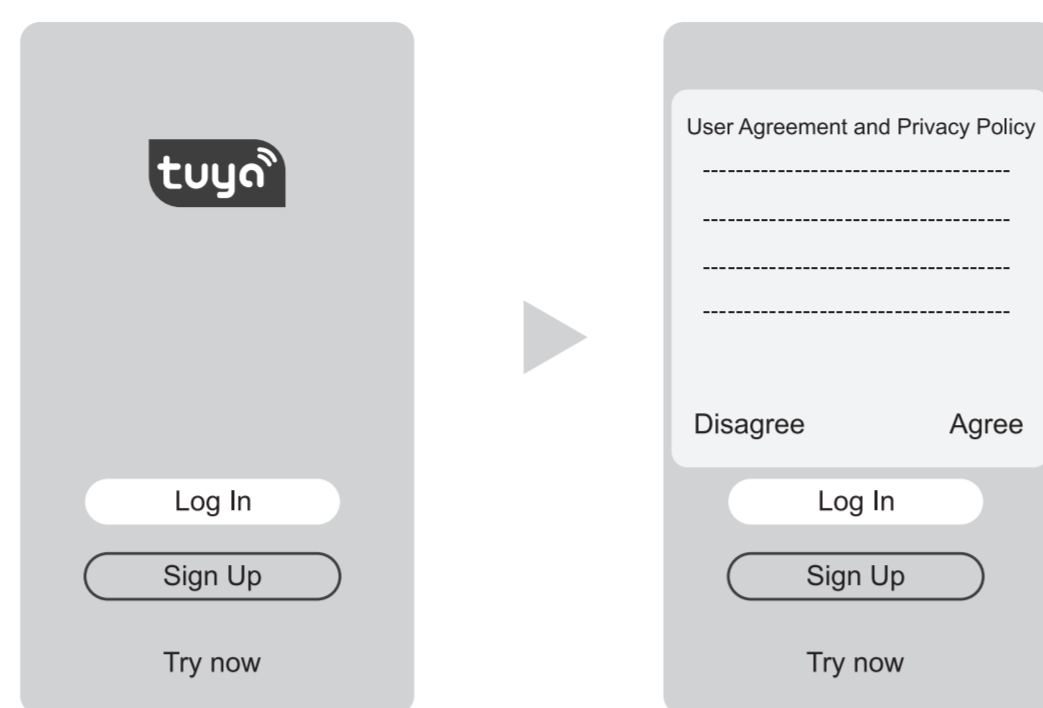

### 1.Installation

Scan below the QR code to install the Tuya Smart APP.

### 2.Registration

Mode 1: Click "Sign Up" and the privacy policy page of Tuya Smart Platform will pop up. After reading and agreeing, you will enter the account registration page.

Mode 2 : You can register with your email or mobile phone number. The country/region will follow the settings of the mobile phone system, or you can manually change the country/region (the country/region cannot be changed after the registration is completed). After entering the mobile phone number or email address, click "Get verification code". After entering the received verification code, you will be redirected to the password setting page. After setting the password according to the prompts below, click "Finish" to complete the registration.

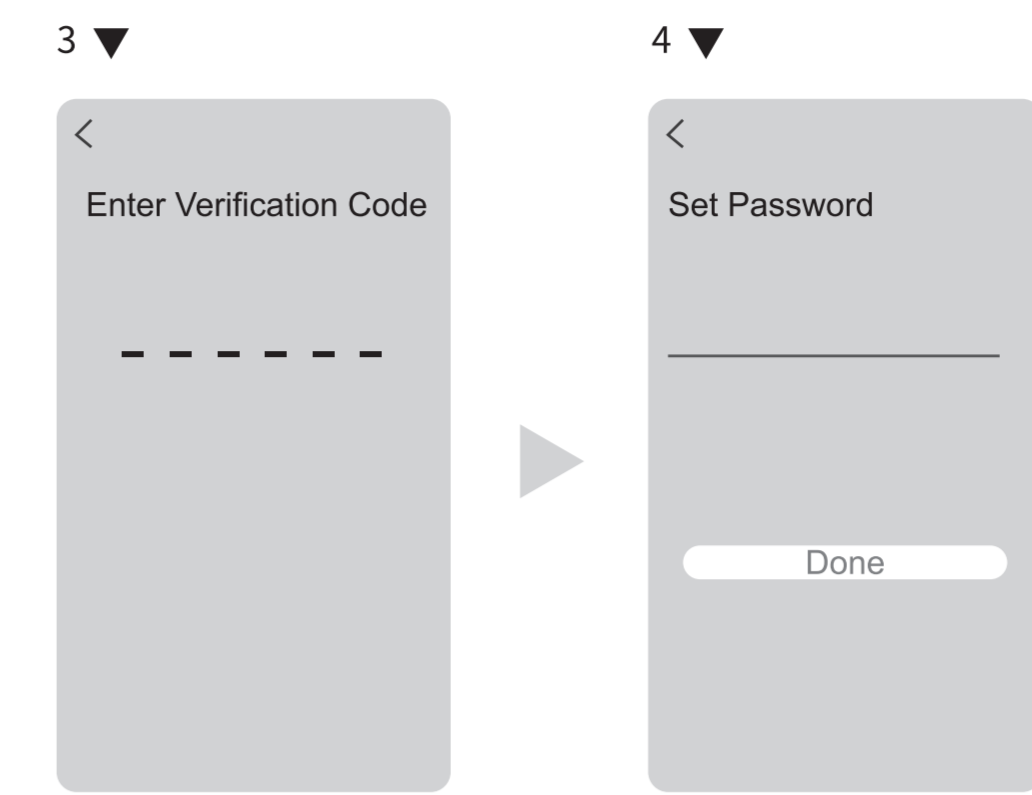

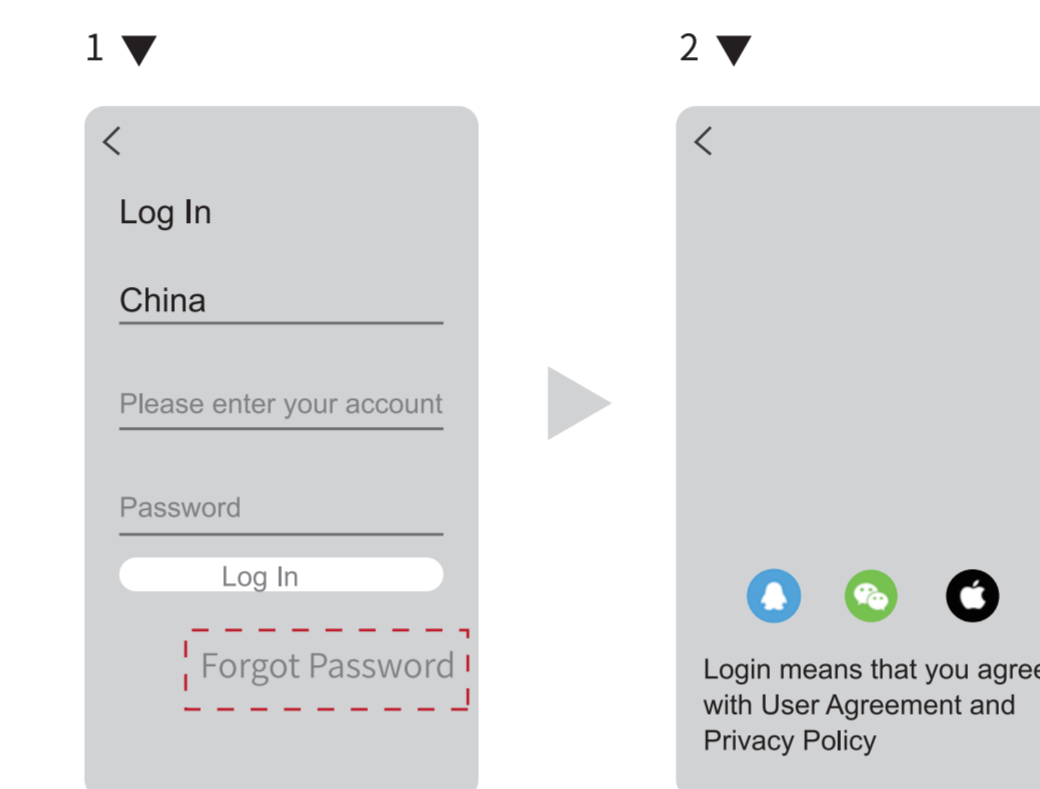

### 3.Login

Mode 1: Account login  
If you already have an App account, click "Log In " to enter the login page. The system will automatically determine the current country/region. You can also manually select the country/region and enter the mobile phone number or email address you used when registering. After entering the password, you can log in to the system.

Mode 2: Third-party social account login  
If your mobile phone has installed WeChat and QQ, click the WeChat or QQ icon in the social account login area, and you can log in to the system after passing the authorization page. If you are using the IOS system, you can also log in with your Apple ID.

## 4.forgot password

If you have forgotten the account login password of the App, you can reset the account password through the process of retrieving the password and click "Forgot Password"; the system will automatically determine the current country/region, or you can manually select the country/region (registered with your mobile phone number) The user needs to change to the country/region at the time of registration), enter the mobile phone number or email address you used during registration, and click "Get Verification Code" after confirming that it is correct. Enter the verification code received by SMS or email; enter the new password and click "Finish" to complete the password reset operation and automatically log in to the account.

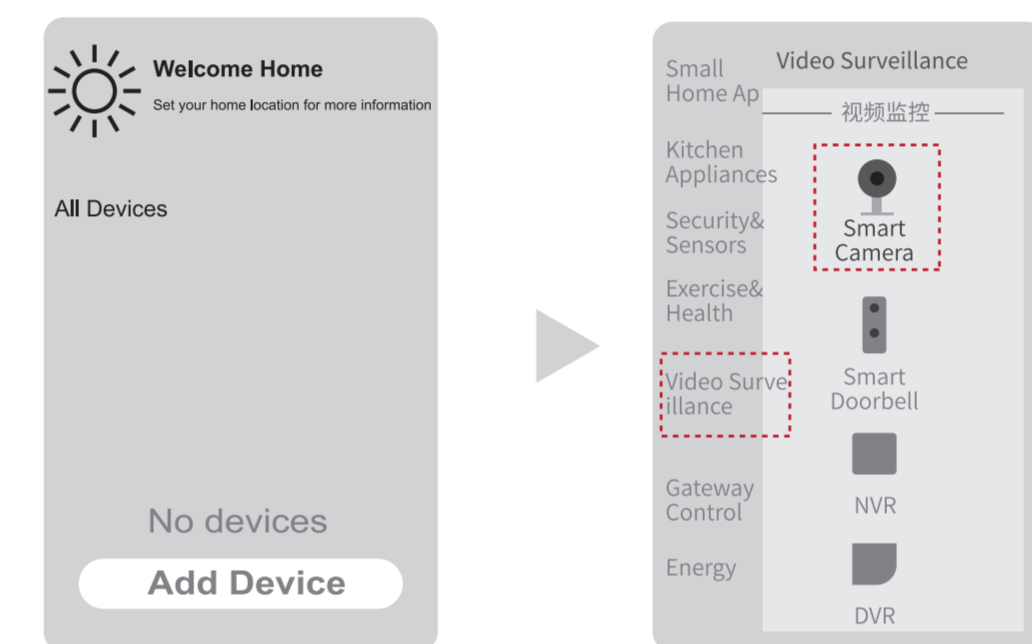

## Pairing the camera to Tuya APP
